### UPCOMING EVENTS

- 10th Aug. Special Assembly for Independence Day
- 17th Aug. Shlok Recitation (Grade - 6 to 9)

### STUDENT'S CORNER

### Teacher's Workshop

A lesson plan is a vital step toward creating a complete curriculum.

Having a lesson plan that has been carefully constructed for every lesson boosts your confidence and maximizes the possibility of having purposeful learning sessions with your students whenever you enter the classroom. It equips you with a general outline of your goals and the things you need to achieve them.

A workshop was conducted to preparing an effective lesson plan and team members

## TEACHER'S CORNER

### WHAT IS TEEJ?

Teej is a festival that is celebrated most commonly in the northern parts of India and is not one, but actually a collection of three different celebrations. Teej puja is normally a celebration for women, where they pray to Lord Shiva and Devi Parvati and rejoice in their union. It is believed that unmarried girls keep this fast to attain a husband like Shiva and married women pray to Goddess Parvati that their married life be as blessed as the holy one. The festival is also meant as a welcome to the monsoon season, as a good monsoon will ensure a good harvest. Teej technically refers to the third day of the month, after the new moon, and the third day of the month, after the full moon of every month, as per the lunar calendar. The festival, which is celebrated during the monsoon season is meant to welcome the rains, but also the greenery and bounty of nature that ensues. Women get together to celebrate this festival by wearing bright clothes, sharing sweets and gifts, singing, dancing, and playing on swings.

## YELLOW COLOUR DAY

“Shades of yellow stimulates our little ones with happiness, energy and optimism.....”

A day dedicated to the yellow color was marked with children dressed in different hues and tints of yellow. The teachers were beaming with pride when the confident little commentators described the yellow objects with expressions, flair and ease.

## MATHS ACTIVITY

"The only way to learn mathematics is to do mathematics".

Grade 10th students performed activity related to the height and distance. They were able to learn how to measure height of a building with the help of clinometer instrument....
